

Coastal Slip Form is looking to fill a Project Superintendent(Concrete) position within the organization immediately. The Project Superintendent will be responsible for the management of field operations, personnel, quality/cost control, and safety within the project.

Coastal Slip Form is a construction company based in Mobile, Alabama. Coastal Slip Form has been in business since 2016 performing work on sidewalks, curb and gutter, median barrier walls, bridge walls, and other miscellaneous concrete work.

Responsibilities

- Coordinate work schedules with the PM to ensure efficiency within the project and organization.
- Assist PM and leadership in the hiring and development of employees within our team.
- Communicate with Prime Contractors on the schedule and management of Coastal Slip Form's work.
- Properly manage field personnel to confirm the work performed is within the contract documents/plans.
- Work to train new employees on the skills needed to perform their job and also to understand the Coastal Slip Form way.
- Manage the procurement for necessary materials need to perform project tasks.
- Work with the PM to facilitate the delivery of equipment needed to perform project tasks.
- Ensure the safety requirements for Coastal Slip Form are implemented and maintained.

Experience/Skills

- Experience working on concrete projects in a supervisor role is a must.
- Heavy emphasis on DOT and other government work.
- Experience in slip forming is a plus.
- Excellent communication and organizational skills are required.
- Ability to read and understand plans are vital.
